

NORDEN[®]
Crafting Innovation

COMPANY

PROFILE

www.nordencommunication.com

Headquarters

Located in London, UK, Norden Communication has over two decades of history, initially focusing on delivering reliable and effective ELV and security solutions.

Comprehensive Portfolio

Norden offers a diverse product range across six product verticals, including Surveillance, Cabling Systems, Public Address, Access Control, Fire Alarm Systems, and UPS Systems, with continuous expansion into new areas. Our commitment to quality, reliability, and innovation ensures safety, connectivity, and efficiency for businesses worldwide.

About

Norden Communication

Global Presence

Over the years, Norden has expanded its reach, servicing markets across Europe, the Middle East, Africa, and Asia, meeting the demands of diverse industries worldwide. With operations in 50+ countries, Norden continues to deliver innovative solutions tailored to evolving security and infrastructure needs.

Commitment to Quality

Norden operates with a dedicated quality assurance team and adheres to an ISO-certified quality management system, ensuring all products meet the highest standards. Our products and solutions adhere to industry standards and regulatory compliance requirements.

Mission

At Norden Communication, we are dedicated to crafting innovative technology that enhances global safety, security, and communication. Our mission is to protect lives, secure assets, and facilitate seamless connectivity by delivering cutting-edge, reliable solutions.

As an ethical, green, and environmentally conscious company, we are committed to sustainability in every aspect of our operations. We pride ourselves on being a culturally diverse and inclusive employer, fostering a collaborative environment that values and respects differences.

Our aim is to become a trusted, mono-brand, single-source provider for safety, security, and communications solutions globally, driving progress and excellence for a safer, more connected, and inclusive future.

Our Product **Portfolio**

Surveillance Systems

Cabling Systems

Public Address Systems

Access Control Systems

Power Systems

Fire Alarm Systems

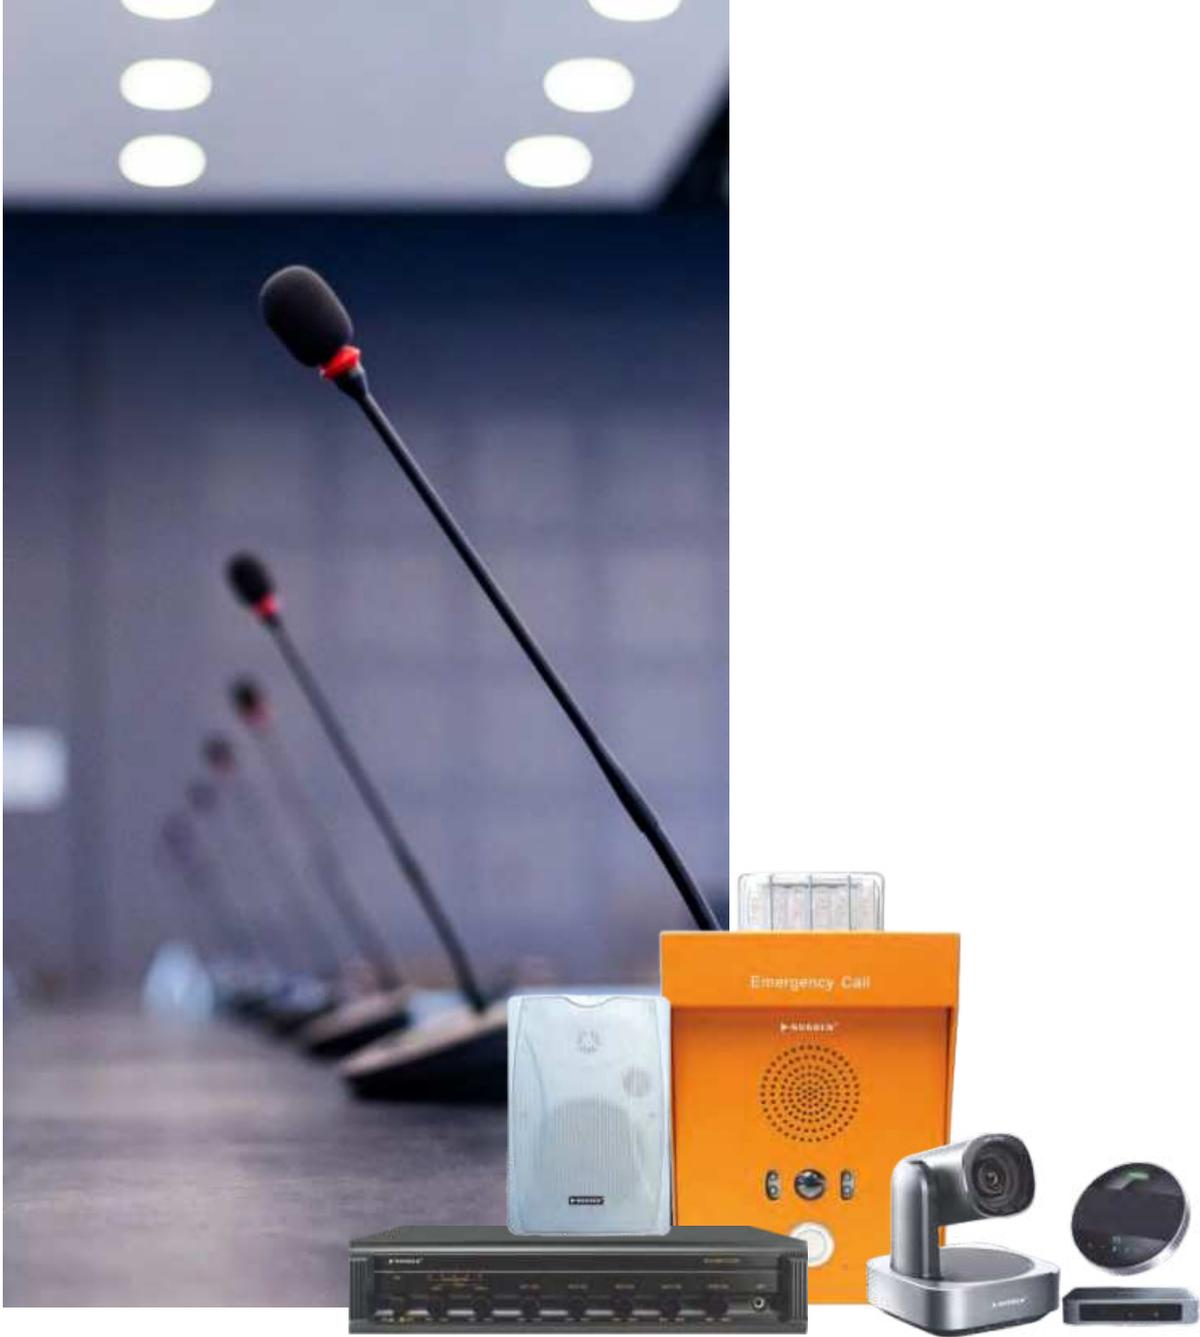

Surveillance Systems

Advanced solutions featuring high-resolution megapixel cameras and monitoring systems designed for 24/7 security. These systems offer comprehensive coverage for residential, commercial, and industrial spaces, ensuring peace of mind with leading-edge technology.

Cabling Systems

Comprehensive cabling solutions crafted for seamless connectivity in telecommunications and data networks. Built for exceptional reliability and durability, they are future-proof, catering to diverse applications, and ensuring efficient and uninterrupted performance.

Public Address Systems

Clear and concise audio systems tailored for effective communication and crowd management. Ideal for public spaces, institutions, and commercial environments, these systems deliver reliability and flexibility for any setting.

Access Control Systems

Secure and efficient access control solutions incorporating advanced technology for enhanced safety and security. Designed for residential, commercial, and industrial facilities, they ensure smooth and reliable management of entry points ranging from a single door to thousands of doors with unlimited users.

Power Systems

Reliable UPS systems providing an uninterruptible power supply for critical operations. Engineered to protect against power outages, they ensure continuity and stable performance in demanding environments. With advanced battery management and efficient power regulation, they safeguard sensitive equipment from voltage fluctuations and unexpected disruptions. Designed for scalability, these systems cater to diverse power requirements across industries.

Fire Alarm Systems

Norden LPCB-certified Addressable Fire Alarm Systems ensure early detection, timely alerts, and seamless emergency integration, minimizing damage, ensuring compliance, and prioritizing safety for residential, commercial, and industrial spaces. The addressable technology enables precise identification of fire incidents, allowing faster response and improved safety management.

Software Solutions

Norden Communication offers a suite of advanced software solutions designed to optimise security, power management, and operational efficiency.

VMS Software : A robust Video Management System that ensures seamless surveillance integration, real-time monitoring, and smart analytics for enhanced security.

HMS Software : A comprehensive Health Monitoring System that provides real-time diagnostics and predictive maintenance for critical infrastructure.

FRS Software : An intelligent Facial Recognition System that enables accurate identification, access control, and threat detection with AI-driven precision.

CMS Software for UPS : A Central Monitoring System for UPS solutions, ensuring uninterrupted power management, remote monitoring, and efficient energy utilisation.

Standards Compliance

Rooted in excellence, Norden solutions are engineered to comply with a diverse array of global standards, from ISO certifications to stringent industry-specific regulations. Our unwavering commitment to quality ensures that every product meets the highest benchmarks for reliability, safety, and sustainability, empowering clients with trusted, globally compliant solutions. Below is a comprehensive list of the standards we adhere to, reflecting our dedication to global excellence and customer trust.
