

FIXED SHELF

A fixed shelf is a non-adjustable platform designed to securely hold networking equipment's inside the server racks. It provides reliable support, ensuring stability and proper organization within the rack.

FEATURES

- Provides a stable platform for heavy or non-rack-mountable equipment.
- Helps organize the server room by accommodating non-standard devices.
- Utilizes empty rack space efficiently for additional equipment storage.
- Made of durable steel for strength and longevity.
- Supports varying weight capacities based on the model
- Securely mounts to vertical rack rails using screws or bolts.
- Designed to fit standard 19" rack width with varying depth options.
- Available with vented designs to enhance airflow and cooling.
- Ensures even weight distribution to prevent sagging or imbalance.

Material	Steel
Surface Finish	Powder-coated
Size/Dimensions	19"
Ventilation	Perforated or Vented
