

IP BASED FIRE ALARM INTERFACE

IP BASED PA SYSTEM

DESCRIPTION

The NVS-IP100021FT is an IP-based fire alarm interface module featuring an industrial-grade dual-core (ARM+DSP) processor with a fast startup time of ≤ 3 seconds. It supports 32 alarm inputs (short-circuit or DC 24V) for integration with fire alarm systems and 8 NO contact outputs for triggering alarm indicators. Designed for scalability, multiple modules can be networked to expand input capacity. With a standard RJ45 port, it supports cross-subnet and cross-router communication, making it ideal for distributed IP-based fire alarm integration.

FEATURES

- Compact 1U rack-mount design with $< 3s$ startup (ARM + DSP chip)
- 32 alarm inputs and 8 short-circuit outputs
- Modular IP interface for scalable system expansion
- Auto dispatch of alarms to server for task execution
- Supports multi-zone and hierarchical alarm triggering
- Works over Ethernet with cross-segment and routing support

Specifications

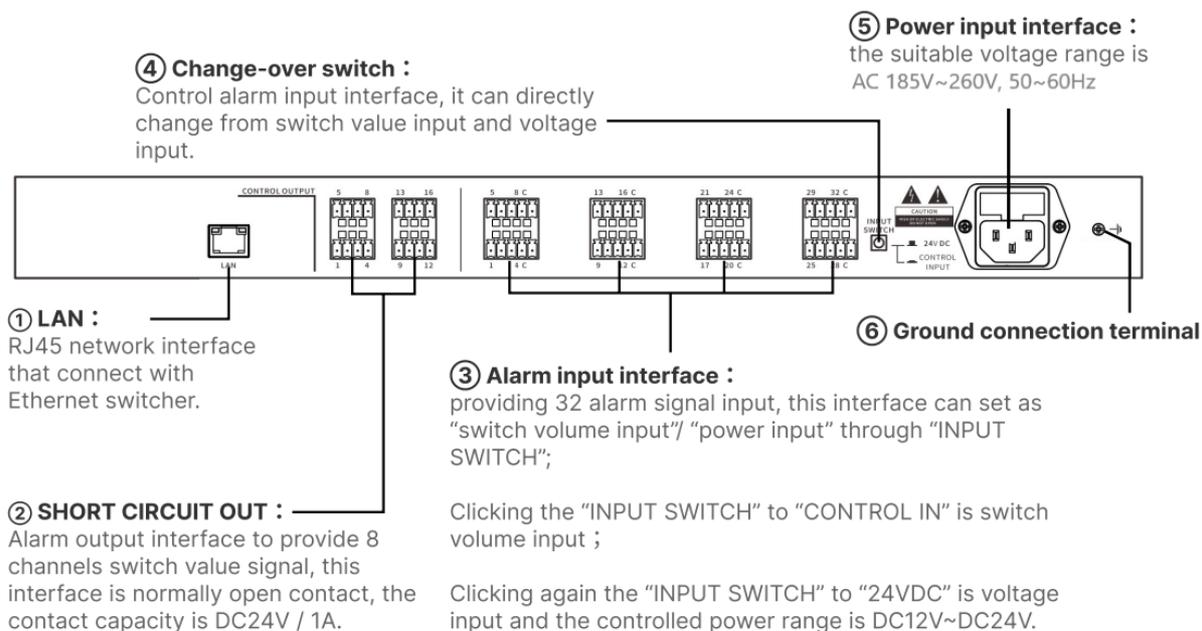

Model	NVS-IP100021FT
Power Supply	AC100V~240V, 50~60Hz
Power Consumption	$\leq 15W$
Network Chip Rate	10/100Mbps adaptive
Network Protocol	TCP/IP, UDP, ARP, ICMP, IGMP
Network Interface	1xRJ45, 32xAlarm Input, 8xAlarm Output, 1xPower Port
Mounting Method	1U Rack-Mounted
Working Temperature	$-10^{\circ}C \sim 70^{\circ}C$ ($14^{\circ}F \sim 158^{\circ}F$)
Operating Humidity	$\leq 90\%RH$ (Non Condensing)
Storage Temperature	$-30^{\circ}C \sim 70^{\circ}C$ ($-22^{\circ}F \sim 158^{\circ}F$)
Material	Metal
Colour	Black
Product Dimensions	483x259x44 mm
Product Weight	2.7 Kg
